SEMANA 5

Creación de las distintas herramientas

Debo instalar primero NODE.JS

Luego creamos la carpeta **semana 5** y dentro de ella la carpeta **Instalacion_herramientas**

React App

- Dentro de la carpeta ingreso al cmd
- Luego pongo npx créate-react-app proyecto01

```
npm GMD retron -Q077
npm GMD network This is a problem related to network connectivity.
npm GMD network This is a problem related to network connectivity.
npm GMD network This is a problem related to network connectivity.
npm GMD network This is a problem related to network connectivity.
npm GMD network In most cases you are behind a proxy or have bad network settings.
npm GMD network If you are behind a proxy, please make sure that the
npm GMD network 'proxy' config is set properly. See: 'npm help config'
npm GMD a complete log of this run can be found in: C:\Users\Jst\AppOata\Local\npm-cache\_logs\2024-85-10T15_19_42_919Z

```

Una vez creado dentro de esa carpeta proyecto01 ingreso el siguiente código.

Cd proyecto01

Npm start

```
To address all issues (including breaking changes), run:

nps audit fix —force

Run 'nps audit' for details.

Success! Created proy01 at D:\Datal\Clases 2020-1\093A Desarrollo de Aplicaciones Web\Labs\Sem06\PracticaInstalacie

joi
Inside that directory, you can run several commands:

nps start

Starts the development server.

nps run build

Bundles the app into static files for production.

nps test
Starts the test runner.

nps run eject
Reseves this tool and copies build dependencies, configuration files
and scripts into the app directory. If you do this, you can't go back!

We suggest that you begin by typing:

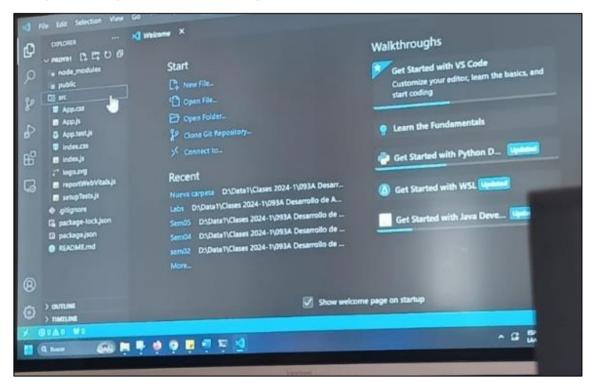

cd proy01

nps start

Nappy hacking!

D:\Oatal\Clases 2020-1\093A Desarrollo de Aplicaciones Web\Labs\Sem06\PracticaInstalacion>cd
```

Se ejecutará y tendremos lo siguiente:

VITE

Ojo: la instalación con vite es más rápido porque todo me da en blanco npm créate vite proy02

seleccionar → react

Selecciono la variante JavaScript enter

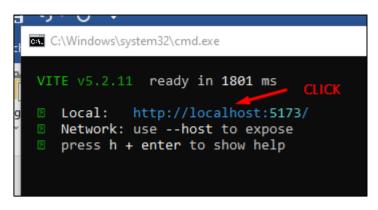

Ahora para ejecutar ponemos los pasitos que me muestra en el cuadrado

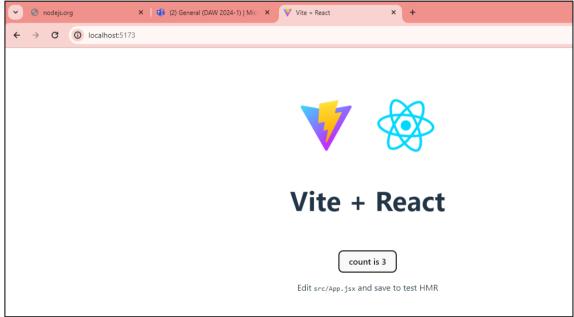

```
E:\DATA C\Downloads\IX Desarrollo web\Laboatorios\Semana6\Instalacion_herra\proy02>npm install
added 278 packages, and audited 279 packages in 54s

103 packages are looking for funding
   run `npm fund` for details

found 0 vulnerabilities

E:\DATA C\Downloads\IX Desarrollo web\Laboatorios\Semana6\Instalacion_herra\proy02>npm run dev
```

Next.js

Todo esta dentro de la carpeta instalación

Npx créate-next-app

Poner→ **Si**

Pide nombre del proyecto poner : proy03

Le gustaría utilizar type script: NO

Slim? No

Tailwind? No

Approuter No

Importar alias NO

Cd proy03

Npm run dev

Copiar la ruta al navegador y lo tendemos ejecutándose el proyecto
